## Cisco CCIE Collaboration Advanced Workshop (CIEC) - [www.fastlane.si/course/ci-ciec](http://www.fastlane.si/course/ci-ciec)

The **Cisco 360 Learning Program** for **CCIE Collaboration** has recently been updated with the new **Cisco CCIE Collaboration Advanced Workshop (CIEC)** course, that teaches students how to use an expert-level, problem-solving process, including options analysis, to support complex Cisco Collaboration technologies and topologies. This is an extensive 5-full-day training with extensive set of hand-on labs and an additional graded lab to evaluate student's knowledge and expertise gained throughout the week.

The course is intended for technical professionals who already passed the CCIE Collaboration Written Exam and are at their initial stages of preparing for the Cisco CCIE Collaboration Lab Exam.

It is delivered worldwide by our specially trained CCSI instructors, authorized and certified by Cisco for this specific program.

## Cisco CCIE Collaboration Preparation Mentoring (CCIE-C-MENT)

We are offering different levels of add-on packages to the **Cisco CCIE Collaboration Advanced Workshop (CIEC)** course. These customized packages allow students to receive personalized mentoring services from our CCIE Collaboration certified instructors. During the initial interview, our CCIE-certified mentors will design the mentoring package that suits your current knowledge and expertise. Our mentoring services include 1-on-1 and group sessions with students to exchange questions, evaluate learning progress, and define next steps in the learning path. Together with self-paced products that are available in the **Cisco 360 Learning Program** for **CCIE Collaboration**, these mentoring services build up student's knowledge and expertise to pass the CCIE Collaboration Written and Lab Exam.

Please contact us for more information on these special packages and we will help you create the training package that will be customized to your existing expertise.

# Cisco Collaboration 10.x

## Cisco Collaboration Systems Release 10.0 Bootcamp (CSR10BC) - [www.fastlane.si/course/fl-csr10bc](http://www.fastlane.si/course/fl-csr10bc)

The 5-day **CSR10BC bootcamp** will help you gain skills and knowledge necessary for initial **Cisco Collaboration Systems Release 10.0** sizing, design, integration, and configuration as well as day-to-day administration and management tasks. It focuses on the initial design, configuration, and administration of Cisco Collaboration applications. Hands-on lab exercises are delivered using an equipment-ready environment where students can focus on their specific areas of interests in **Cisco Collaboration Systems Release 10.0** configuration, verification, administration, and testing tasks.

The course is intended for support and deployment engineers, field engineers, administrators, or anyone who needs an understanding of the **Cisco Collaboration Systems Release 10.0** solutions.

## Cisco Collaboration Systems Release 10.0 Update (CSR10U) - [www.fastlane.si/course/fl-csr10u](http://www.fastlane.si/course/fl-csr10u)

The 3-day **CSR10U course** will help you gain skills and knowledge necessary for assessing the advantages of **new Cisco Collaboration Systems Release 10.0 features and applications** and for designing, implementing, and monitoring these new features and applications. It focuses on features and applications that have been added or improved after Cisco Unified Communications release 8.0 and is supported by hand-on lab exercises.

This course **closes gaps between available Cisco Unified Communications release 8.0 courses and the new Cisco Collaboration Systems Release 10.0**.

The course is intended for support engineers, deployment engineers, and administrators who need to understand, design, implement, or monitor the features that have been added to Cisco Unified Communications after release 8.0.

## Cisco Unified IM & Presence 10.x Workshop (UIMP10W)

The 2-day **UIMP10W workshop** will help you gain skills and knowledge necessary for **Cisco Unified Communications IM and Presence 10.x** sizing, design, integration, and configuration as well as day-to-day administration and management tasks. It focuses on the initial setup and configuration of Cisco Unified Communications IM and Presence including integrations with LDAP server, databases, CWMS, and Cisco Prime Collaboration. Hands-on lab exercises are delivered using an equipment-ready environment where students can focus on their specific areas of interests in **Cisco Unified Communications IM and Presence** configuration, verification, administration, and testing tasks.

The course is intended for support, field, and deployment engineers, administrators, or anyone who needs an understanding of **Cisco Unified Communications IM and Presence 10.x**.

Please contact us for more details about this workshop.

## Cisco Unity Connection 10.x Workshop (CUC10W)

The 2-day **CUC10W workshop** will help you gain skills and knowledge necessary for **Cisco Unity Connection 10.x** sizing, design, integration, and configuration as well as day-to-day administration and management tasks. It focuses on the initial setup and configuration of Cisco Unity Connection including integrations with LDAP server, Microsoft Exchange, and Cisco Prime Collaboration. Hands-on lab exercises are delivered using an equipment-ready environment where students can focus on their specific areas of interests in **Cisco Unity Connection** configuration, verification, administration, and testing tasks.

The course is intended for support, field, and deployment engineers, administrators, or anyone who needs an understanding of **Cisco Unity Connection 10.x**.

Please contact us for more details about this workshop.
